

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning at page 7, line 14 of the specification with the following rewritten paragraph, shown in marked-up form:

--A polymerizable resin material for making a plastic lens is disclosed. The resin material includes bisphenol A ethoxylate (1 to 4) dimethacrylate, benzylmethacrylate, and, optionally, one or more stabilizing monomers. The preferred stabilizing monomers are trimethylolpropane trimethacrylate, isobornyl methacrylate, ~~ethoxylate~~ ethoxylated nonyl phenol acrylate, 2-phenoxyethyl methacrylate esters, and/or ethoxylated ~~monyl~~ nonyl phenol ~~acrylate~~. Various preferred lens compositions also include other such ingredients as UV stabilizers, dye stabilizers, and, optionally, one or more photoinitiators.--

Please replace the paragraph beginning at page 16, line 13 of the specification with the following rewritten paragraph, shown in marked-up form:

--Irgacure[®] 1700 ~~UV-stabilizer~~ photoinitiator, about .18%, by weight.--
